

Omnia L (european arm hinges)

The Omnia L hinge-arm clips onto the mounting plate from any desired angle. No more struggle to line up the hinge to the front of the plate.....any way will do!

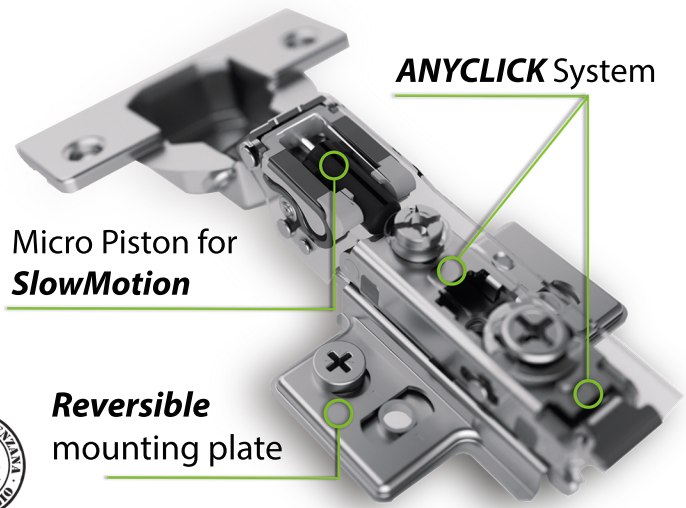

The Omnia L hinges are made in Veduggio, Italy. This is FGV's new top of the line program that offers an elegant design and an innovative new way of clipping a hinge onto a mounting plate

Don't pay attention which way to install the Omnia L plate. Use this feature to position the cam screw (for height adjustment) for easy access

Reversible Plate

Micro Piston for SlowMotion

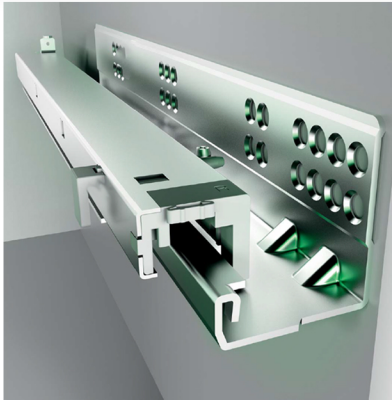

ANYCLICK System

Reversible mounting plate

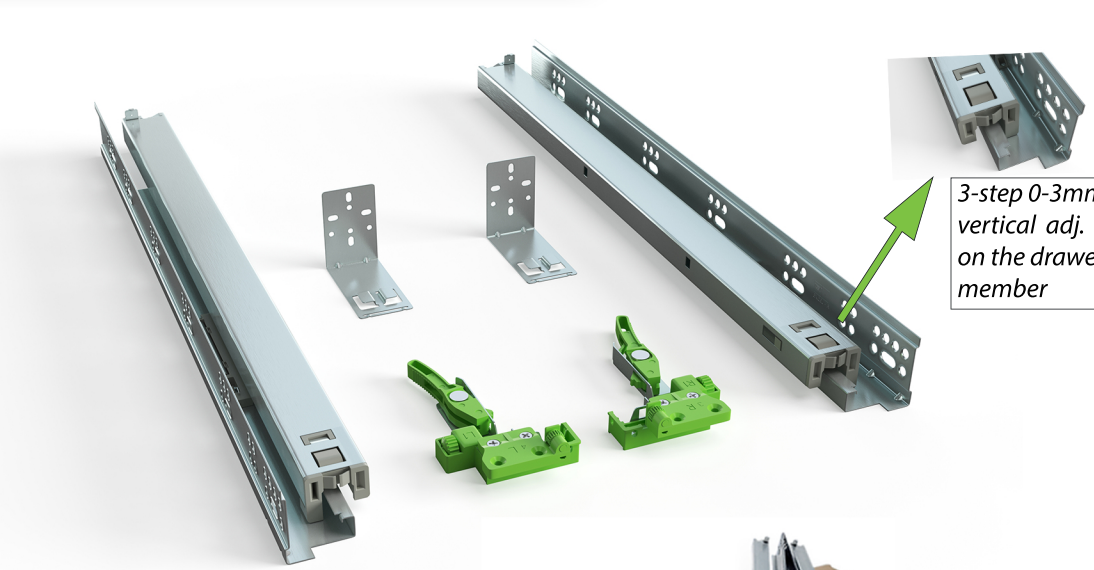

Available in several overlays and attachment screws/dowels

EXCEL (undermount slides)

Smooth and synchronized travel
Easy to adjust 3-way (up-down adjustment located on the drawer member)

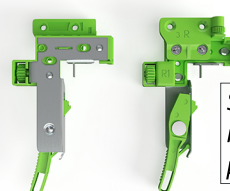

3-step 0-3mm vertical adj. on the drawer member

Master box of 6 sets includes slides and locking devices

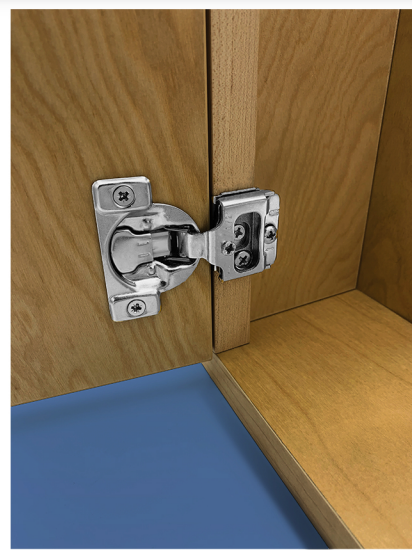

Metal piston

Strong locking devices for in-out/side-to-side adj. with partial metal construction

Available for 5/8" and 3/4" drawers / soft close or push-open

Kompakta (face frame compact hinges)

ZERO+ ES44

The geometry behind the design of ES44 ZERO+ hinges minimizes the gap between the door and the frame

Simple+

The Simple+ line is straight forward with pre-set overlays and ease of installing the doors onto the cabinets*

*make sure to drill the door at 3mm tab

The Kompakta soft close line comes with all-around 3D cam adjustments and surpass 50K cycles. Minimalistic design at a great value

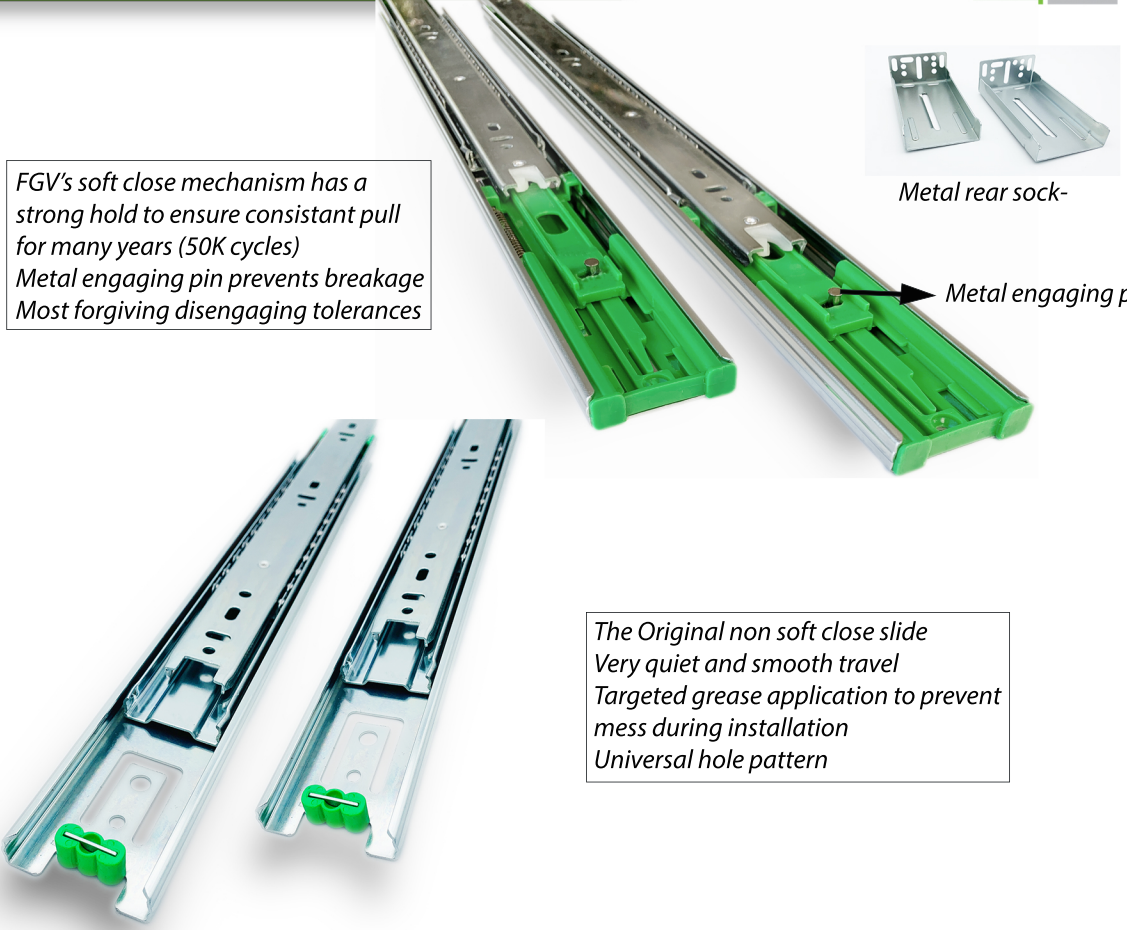

Available in several overlays and attachment screws/dowels

X-Treme (ball bearing slides)

Either in soft close with a strong metal engaging pin, non soft close OR push-open, FGV's H=45mm ball bearing slides are quiet and smooth for over 50K cycles

FGV's soft close mechanism has a strong hold to ensure constant pull for many years (50K cycles)
Metal engaging pin prevents breakage
Most forgiving disengaging tolerances

Metal rear sock-

Metal engaging pin

The Original non soft close slide
Very quiet and smooth travel
Targeted grease application to prevent mess during installation
Universal hole pattern

Available from 10" to 28" (10 sets per box)
